LECTURE ON BOYS' WORK YESTERDAY

Taylor Statten Appeals For Teen Age Boy C.S.E.T. PROGRAMME

Training Classes For Leaders Next Month

Mr. Taylor Statten, Secretary of the National Boys Work Board, addressed a small but appreciative audience in Strathcona Hall yesterday afternoon. Dr. Best, who is himself interested in this work, introduced the speaker by a reference to his untiring efforts on behalf of the growing boy.

Mr. Statten commenced by saying that he had been disappointed in more than one young man at McGill who should have been engaged in Boys work. College men cannot afford to refuse giving some service to the world. Studies may be hard and their time is somewhat taken up but unless they can present some offering of sacrifice they are sure to get nothing in return. Mr. Statten pointed out that the possibilities in Boys work are tremendous. The contact with young minds keeps one close to youth and helps to ward off the stiff formalism that seems to accompany advancing years. But, apart from this, the realization of having helped a boy over the tempestuous years of the early teen age is more than a mere reward. Professional and business men are beginning to see that here is a field of vital importance and they are giving their time and money for the advancement of this work. Mr. Statten looks on Boys Work more as a hobby than a profession. The early teen age, from 12 to 15, is a critical one in a boy's life. At this time he begins to unfold; he makes decisions for himself, the influence of parents and home is gradually weakened and he comes under the sway of the gang, whose leader is his hero. Much depends on this leader as to whether his future life is to be for good or evil, and here is where the influence of another boy means so much to this young life.

(Continued on Page 2.)

DARTMOUTH HOLDS WINTER CARNIVAL

McGill Teams To Compete At Hanover Feb. 11th.

News comes from Hanover that the plans for the Winter Carnival on Feb. 11 have been finally completed by the Outing Club Committee. The McGill Ski Club and Snowshoe Club have both entered, and will send down teams to Dartmouth.

The other colleges that will be represented are Williams, University of Vermont and perhaps Norwich.

There will be the usual dashes and proficiency contests that have been held in previous years, together with several new events that have recently been added to the program. Among the races listed are the 220 yard ski and snowshoe dashes and the cross-country races. The cross-country race for the ski men will be over an eight mile course, while the snowshoe race will only be a four mile affair. There will also be a medley relay race composed of two snowshoe and two ski men. Each man will run half a mile.

Dartmouth's new ski jump is all ready for the jumps.

There will be no limit to hospitality. Hanover will be crowded, but every attempt is being made to find appropriate accommodation. Dinner and supper is to be served during the Carnival by members of the Hanover Women's Club.

The Class of 1922 are going to have "Movies" taken of the Carnival.

NEW LIGHTING SYSTEM.

A lighting system has been devised for highways which makes it possible for night automobile drivers to travel with headlights dimmed, so brilliantly is the roadway lighted. Part of the Lincoln highway will be lighted by this system.

STUDENTS TO VISIT MEXICO.

Dr. A. J. Armstrong of Baylor University is now organizing a party which will spend the summer traveling and studying in Mexico. The party will be conducted by a number of the Spanish faculty of Baylor, who has lived there several years. They will study during the summer session of the University of Mexico in Mexico City. Week-end trips will be made with the co-operation of native lecturers. The party leaves June 15 and returns two months later.

COLOURFUL SCENES AT UNION PROM.

Sir Arthur and Lady Currie Dean and Mrs. Laing Were Present

BALLOONS

Music Good and Ballroom Not Crowded

The Union House Committee provided a formal dance last evening which has not been equalled this season for sheer enjoyment. The small number of dancers assured the comfort of all, and there were plenty of cosy sitting out places for everyone.

The ballroom and lounge room were tastefully decorated with palms and the lights were shaded with red and white. The red and white wall decorations of the ballroom alternated with flags at the sides of the ballroom.

The McGill Dance Orchestra provided the music and as usual were immensely popular. The moon waltzes were especially well rendered and were much appreciated by the dancers. During one of the numbers, balloons played a prominent part, and an air of gaiety and lighthearted merriment spread round the room as each vied with the other to keep their balloon intact. The mortality among the balloons was remarkable and scarcely one was left at the end of the evening.

The refreshments were served in two sittings and were of the usual tastiness with possibly an added piquancy due to the special catering by Mr. Darville for the Union Formal.

The costumes of the fair dancers were a riot of colour. Like a rose-garden in bloom they presented an exquisite picture as the colours mingled in ever-changing display. Blue, yellow, green and red, the shades were of varied intensity from canard blue and fuchsia to orchid and palest pink. There were several striking gowns trimmed with sequins and one particularly attractive one was a combination of fuchsia taffeta and delf blue net. Black was the least common and the peach and orange shades the most popular.

Lady Currie, Mrs. Laing, Mrs. Whitnall, Mrs. Porter and Mrs. Brown were patronesses, and Sir Arthur Currie and Dean Laing were also present.

Among those present were The Misses M. Granger, F. Spvainley, J. Hunter, T. McEwan, D. Beechkel, G. MacConachie, K. Godwin, R. Terrance, E. Terrance, D. Hamilton, M. Tyler M. Muir, Margaret Gilmour, Eileen Anderson, A. Lawson, M. E. Ellis, Jean Campbell, Maude Olding, Marguerite Brown, E. M. Campbell, L. B. Ellis, Mary McVey, Margarie Leggatt, BeBrnice Skeeton, Jean Reynier, Doris Austen, Eileen Pratt, Anna McPherson, M. Hoffman-Smith, F. Argue, Miss Strachan, A. Randel, E. Heathcote, Miss Quackenbush, E. M. Sharp, Pauline Lacoste, Betty McArthur, Evelyn Bantill, Grace Morris, Kathleen Stenson, H. M. Gillies, L. Argue, Germaine Truchan, Myrie Smythe, Jean, I. Aylen, T. Somersel.

(Continued on Page 2.)

SCHOLASTIC TRACK MEET THIS SPRING

Canadian School Boys To Compete CLASSES CHANGED

Date Set For May 27th. Will Be Annual Event

The McGill Inter-Scholastic Track and Field meet will be held this year on Saturday, May 27th. This is the second event of its kind and from the results of last year's meet it was thought worth while to make it an annual event. It is open to school boys from all over Canada and the competition is very lively between the various schools. Last year the honours went to Hamilton Collegiate but there are many rivals who are looking forward to carrying off the laurels this year. The youngest class, 11 years and under, has been eliminated and more events have been scheduled for the older boys. The age and weight classification has been changed to avoid any injustice to competitors. The boy's interest in any form of athletics is proverbial and there should be a creditable exhibition of sport on May 27th.

Following is a schedule of event:—

CLASS 1.—Boys 13 years of age, irrespective of weights. Boys 14 and 15 years of age and under 100 lbs.

Events: 75 yard dash; Running High Jump; 220 yard run; 440 relay; 4 boys each 110 yards. (All boys from same school.)

CLASS 2.—Boys 14 and 15 years of age and over 100 lbs. Boys 16 and 17 years of age and under 120 lbs.

Events: 100 Yard Dash; Running High Jump; 880 Yard Relay; 4 boys to run 220 yards each (all from the same school.) 440 Yard Run; Running Broad Jump.

SENIORS.—Boys 16 and 17 years of age and over 120 lbs. Boys 18 years of age irrespective of weight.

Events: 100 yard dash, 220 yard dash; 440 Yard Run; 880 yard run; 1 Mile Run; 120 low hurdles; 12 lb. shot put; Running high jump; pole vault; Running low jump; 1 mile relay; 4 boys each 440 yards (all boys from same school.)

GYMN. DEM. TO BE GIVEN SOON

To Send Basketball and Hockey Teams to Toronto

"Coming events cast their shadows before." And it is coming! What? The event of the season, of course. Its shadows have even now begun to creep out. There they are—queer, distorted prancing shadows, and slow-moving, graceful ones, energetic shadows and calm, sedate ones.

Suddenly, forming in large black letters on the wall, you can see the mystic meaning of all these contortions.

"Gymn. Demonstration" Magic! words! To most they bring a thrill; to all a realization of work and stiff application to it; but it is work performed with a will.

For is it not true that a worthy team must go to the far city of Toronto to uphold the honour of the R.V.C. in basketball? And is it not also true that a hockey team must journey with them?

The railroads have hearts of stone. Not even for such a goodly array will they transport their passengers free of charge. Even so, then, must such transportation be provided.

Much discussion arose about this sad question. It was felt that the University Settlement could not be entirely ignored. At last a decision was arrived at. Our teams will be provided with all that is necessary for their trip, what remains will be turned over to the University Settlement.

We know that these teams are going to play to the very best of their ability for the honour of old McGill. It is now the part of every girl, be she freshman, sophomore, junior or senior to shoulder her responsibility and do her "bit" to make the demonstration the greatest success it has ever been. You can help send these intercollegiate teams happily to Toronto.

And remember, that the more money you are able to raise, the greater will be the benefit of the University Settlement.

What can we do.

HOCKEY REPORT.

Telegraphic reports of the hockey game at Toronto today will be received by periods and will be posted in the Union.

OLD RIVALS CLASH IN TORONTO TODAY

McGill - Varsity Hockey At 2.30 P.M.

McGill senior hockey team plays its first intercollegiate game for this season today when they do battle with the blue and white sextette at the Toronto Arena at 2.30 p.m. The team, strengthened by Flanagan, who, it is expected will be in condition to play part of the game at least, left last night at 11 p.m.

While undoubtedly the Red and White squad will be playing a more experienced and perhaps better balanced team in the Allan Cup holders, their supporters take comfort and confidence from the fact that all is not as well as it might be in the Toronto hockey machine. They have to date won only one game in the O.H.A. senior series, and in the past ten days have lost three straight and played a drawn game on Wednesday night, with the Hamilton tigers, rated as one of the weakest teams in the league.

Taken in all, therefore, despite the fact that several of the players on the McGill team are newcomers and the ranks of senior hockey, and that they are playing on a foreign rink, the chances for a victory are very considerable.

The news of the game will be received by periods and the results posted in the Union at intervals during the afternoon.

The McGill team will in all probability start out, with Stenson in goal, Dempsey and McGerrigle on the defense and Anderson, Duncan and Lynch or Flanagan on the forward line, with Kent and Goddard as utility men.

CLASS HOCKEY AT RINK IN HOLLOW

Four R.V.C. Teams Will Play Saturday Morning.

Rooters! Attention! All out to cheer your class team to victory!

This morning, the rink in hollow will be the scene of hard fought battles. The first round of a series of class matches will be played off, and they will be well contested. At 9 o'clock, R.V.C. '23 will strive mightily with R.V.C. '25, for the laurels. 'Twill be a royal game.

At 10 of the clock, R.V.C. '22 will likewise do battle with R.V.C. '24. This will be a very equal fight, as both teams are very strong.

Having had ice so early this season the teams have had more practice, and the games ought to be very entertaining. So all out, ye rooters! The better the support, the better the game.

The line up will be as follows:

9 A.M.	
'23.	'25.
Goal.	
L. Kerr E. Petrie	
Right Wing.	
L. Evans T. Somerset	
Centre.	
A. Roy E. Longworth

DR. SHAPLEY EXPLAINS THE STRUCTURE OF SPACE.

Dr. Harlow Shapley, director of the Harvard College astronomical laboratory, has prepared a scientific treatise on "Star and Atoms," which will be published in the February number of The Tech Engineering News.

In the article Dr. Shapley tells of the manner in which interstellar space can be accurately measured and of the experiments carried on at Tech-nology that have made these measurements possible. The general method employed is that of the peculiar action of gases when ionized and when the atomic structure is changed. The inadequacy of the triangulation method of measurement and the superiority of the photometric systems are fully explained. Simple illustrations are given so that those who are unaccustomed to astronomical terms or methods can easily follow this latest branch of modern astronomy. Dr. Shapley also tells of the atomic structure and odd behavior of the various known interstellar gases and their spectra relation to the various elements such as strontium, manganese and calcium.

McGILL-TORONTO BASKETBALL TODAY

Red and White Quintette Confident of Victory.

Coach George Fox and his band of basket ball players are in Toronto today waiting for the time when they will tackle the Toronto Varsity quintette on the Hart House floor this evening. The Red and White team are confident that they can start their season off in good fashion by defeating the Toronto team and they will put every effort into the game to accomplish that end.

It is some time since a McGill basketball team has defeated Toronto in the Queens City and the present representatives of "Mac's" are out to chase the jinx that has been following them everytime they make the trip. If they can defeat the Blue and White squad on their own floor they feel that there is little doubt of the outcome of the return game which will take place here within the next few weeks.

The strength of McGill's quintette this season lies in the forwards and it is here that they expect to outclass their opponents. The guard positions are not so well filled owing to the graduation at the same time of both of last year's regular guards, but the coach thinks that the over abundance of good offensive men will make up for any deficiency on the defence.

Hay and Manson on the forward line are big enough to top the majority of the players who will be pitted against them and this alone should prove to be a big advantage to the team. Hay is finding the basket oftener this season than has been the case for a few years past and there is every hope that he will be as effective as he was when he first made his appearance on the college team. Manson is a newcomer to the squad but is a veteran player and will be a tower of strength on the offensive.

The other men available to play as forwards are Little, Laishley, Crain, and Bourke, while some of these men are also used on the guard positions at times.

The Toronto team is reported to be as strong as it has been during the past few years. Although some of the team that won the intercollegiate championship last season left the team, they were strengthened by the addition of a few good newcomers and they appear to be ready to give a battle to any team that may meet them. However the game this evening will be the first test of the real ability of both teams and will give a good idea of the chances each one has to carry off the intercollegiate championship for this year.

STRONG B. AND W. TEAM LEAVES FOR OTTAWA

The McGill B. W. and F. club are sending a contingent of seven boxers and two wrestlers to Ottawa today to take part in the assault-at-arms being held there tonight in connection with the winter carnival. McGill opponents have been picked by a series of eliminations bouts during the past few days, from the whole Ottawa district, so the team will certainly encounter very stiff opposition. Last year, McGill boxers made a very favourable impression in Ottawa and it is to be hoped that they will do even better this year.

The McGill men have been picked by coaches Robinson and Smith, guided by the results of the B. W. and F. smoker bouts and, by the general form shown, and are therefore the pick of the University.

The two wrestlers going are Matthews, in the 125 lbs class, who will wrestle with Snyder, and Dave McKenn, the heavyweight who is going to wrestle Waghorn.

The list of boxers and their prospective opponents follows:—

McGill.		Ottawa.	
108 lbs. Scheifer	boxing	Doherty.	
112 lbs. Mirsky	boxing	Neuchline.	
118 lbs. Goldapple	boxing	Smith.	
125 lbs. Wener	boxing	Dubois.	
135 lbs. Shackell	boxing	Faubert.	
158 lbs. Abinovitch	boxing	Timmis.	

TO START REAL NEWSPAPER.

Co-eds of the University of Pennsylvania are thinking of starting a newspaper—a real daily, with a city editor, news editor, cockroaches, editorial writers, foreign correspondents and libel suits.

There appeared on the bulletin boards of various buildings on the campus notices asking for suggestions as to a name for the paper, an editorial policy and for nominations of a managing editor, advertising manager and so on. Only seniors and juniors, the poster said, will be eligible for such offices.

The reason for this near-venture is doubtless the general dissatisfaction among co-eds with the Pennsylvania, the editors of which, for some reason, have never been cheerful about the co-educational aspects of the University.

COLLEGE SPIRIT

Brown University men demonstrated a college spirit and support of their team that has hardly ever been equaled, when 200 students walked 240 miles to New Haven, to see their team play the Yale eleven, some time ago.

Orange & Gold Package	1.00
Sweetheart Package	1.25
Fruit Cordial Package	1.50
Cherry Cocktail Package	1.50
Variety Package	1.75

JUNIOR TEAM WILL PLAY WELLINGTON

Both Teams Now Tied for Second Place.

This afternoon the Junior team will meet the fast Wellington Six in a game which promises to be very closely contested. At present both these teams are tied for second place, each having won two games, lost one, and tied one.

The McGill men have been practising hard under Coach Shaughnessy, and should give a very good account of themselves to-morrow. McGill's chances of winning the championship are very bright. The team is improving with every game, and it was only lack of practice which was the cause of their defeat in the opening game of the season.

The probable line-up will be as follows:—

McCall		Lino		Joslin		Gammel		Connor		Abbot	
Goal	McCall	Defence	Lino	Defence	Joslin	Centre	Gammel	Forward	Connor	Forward	Abbot
Subs—		Consiglio, Hyman, Carruthers, Smith.									

Standing in the Junior Hockey League.

	W.	D.	L.	Pts.

TICKETS FOR HOCKEY MATCH

The tickets for the Queens game on February 4th and the Varsity game on the 17th will be placed on sale for season ticket holders on Monday. Until Wednesday night the season ticket holders will have the exclusive right of purchase. On Thursday the individual tickets will be sold. The price for Box and Promenade Seats is \$1.65 and for Reserved seats \$3.10. Everybody should make sure of a good seat by buying early.

THEORIES ARE ALL RIGHT— BUT

A student doing some research work a few days ago went down to the Lawrence Telephone Company's office to interview a "telephone girl" or a manager of "telephone girls." He came back impressed with the thought that telephone operators have to have a lot of good sense to hold their jobs. He was surprised to have found that not just anyone can do that work. In speaking of the experience to some friends, one of them replied that he had found out that almost any one of these so called "common jobs" require exercise of good judgment, and withal, more intellect than is generally supposed. He got his ideas while working at the stadium last summer. He told about, seeing several college men down there working as day laborers and he said that many of them were not able to carry out the orders of the foreman as sensibly as some of the less educated workmen.

All this coupled with the fact that big concerns everywhere are cutting down their working forces and all the while expecting more of the employees that are retained, has a meaning for college men and women. It is still more significant when one considers the thought brought out in a newspaper story from New York recently to the effect that college trained persons are actually having hard times finding jobs—not positions—but just plain jobs. Women with A. B. degrees there are trying for places as counter clerks and are refused employment, the department store managers preferring to hire girls with experience, regardless of the education. The fact that college degrees are becoming so common now-a-days, coupled with the fact that business is cramping itself rather than expanding, puts a discount on the college education, commercially speaking, in comparison with the grim old implement of the bread winner, experience.

All this is no argument against the college education. It merely points to the fact that the college man should be looking out for his future welfare as he goes along. During the summers, during the school year as much as possible, all the time, he should be getting practical work in the line which he intends to follow. Such a policy will make him able to go to his future employer and say, "Yes sir, I know how it's done. I've had experience along that line."

SEVERAL GAMES OF BASKETBALL

McGill Plays Two Intermediate and One Junior Game Today

The intermediate basketball teams will have some of the hardest games of the season on their hands today when they meet the fast travelling quintettes from the North Branch Y. M.C.A. The "A" team meets one of the teams from the North end in the gymnasium on Park Avenue, while Molson Hall will be the scene of the other contest. Junior C meets Westmount A.A.A. at Molson Hall at five o'clock this afternoon.

The game between the Intermediate A team and North Branch promises to be the best contest of the day. The McGill five, leads the league having travelled so far without meeting a defeat but they will have quite an obstacle to overcome in passing the North Branch squad safely. So far the contenders for first position have only lost one game and they will try hard to move up on an even basis with McGill today.

All of the McGill teams appear to be very strong this year and there promises to be some very good games in the junior class as well. The junior game with W.A.A.A. is expected to be fast with the edge in favor of McGill.

The men who will probably be seen on the McGill intermediate teams are the following:—

"A"		"B"	
Scharie	Forwards	Boyd	
A. James	Forwards	W. James	
Amaron	Centre	Tinkiss	
Blumenstein	Guard	Rorke	
Schwartzman	Guard	Rafolovitch	

INTERCOLLEGIATE MAGAZINE ISSUED.

The efforts of students from various colleges to combine the best work from their literary magazines into one number each month has finally resulted in the Intercollegiate Magazine, the first number of which has been issued by the Princeton University Press. This magazine is the result of the efforts of Miss Ruth Metzger, editor of the Wellesley College Magazine in 1920-21, who proposed its formation last year at the Intercollegiate Conference of Magazine Editors.

The magazine, however, is not as yet an official organ of the colleges and has been issued as an independent venture. Its purpose is to put on the news stands a college magazine which will contain the best examples of undergraduate thought. Princeton, Radcliffe, Oberlin, Harvard, and Wellesley are associated in the first number, which is made up of one-act plays, verse, and essays.

Ford—1922

The same efficient every-day Car

UTILITY—first, last and all the time—is the guiding principle behind the manufacture of Ford cars. Every dollar you pay for a Ford must return 100 cents value in the service it performs.

There are no fancy trimmings—no cut glass vases, no cigar lighters, no clocks that are never wound—to swell the price. It is equipped with everything you need for service and dollar for dollar is still the biggest motor car value you can buy.

The Prices on all Ford Models have been reduced from \$20 to \$60, effective January 16th, 1922.

Ford Motor Company of Canada, Limited, Ford, Ontario

THE ANNUAL GYMNASIAC COMPETITION

Fine Prizes Offered to Winners.

ENTRIES INVITED

Wicksteed Medals, Harvey Cup, and "M's" as Awards.

This competition, to be held late in February or early in March offers a better opportunity for men to display all round gymnastic and athletic ability than any other event on the University athletic program.

The competition is divided into three divisions:—

1.—Students of graduating year; the winner to be awarded the Wicksteed silver medal and "M."

2.—Students of second and third years, the winner to be awarded the Wicksteed bronze medal and "M."

3.—Students of first year; the winner to be awarded the Dr. Harvey Cup.

The events will follow the same general lines as last year and all have an equal chance of winning.

The object of this test is to promote all round fitness and all have an equal chance of winning. The object of this test is to promote all round fitness and all have an equal chance of winning.

Practise periods for both the Wicksteed and Intercollegiate competitions are being held on Tuesday, Wednesday and Fridays at 6.00 P.M.-7.00 P.M., at the High School Gymnasium.

Any man who has any interest or ability for gymnastics or indoor athletics is invited to turn out to these practices when some one will be present to coach and give any assistance.

The Wicksteed Competition will serve as a trial for those trying to make the Intercollegiate team and for this reason should see a large entry.

THE THOUGHTLESS SPOOKS IN TRAINING

O! wonder of wonders! a new school has established itself at McGill, with the Arts Building as its base. It is a training school for thoughtless spooks, where these individuals are drilled in running, jumping, pounding upstairs and downstairs, and causing disturbances in general. They have no leader in this new school, but each spook sees to it that he follows out the prescribed program, and makes as much noise as possible.

The program they have hit upon, might be summed up as follows—from five to fifteen minutes after any hour, the thoughtless spooks line up in a disorderly manner at the head of the stairs in the main hall. These stairs lead into the subterranean passage, above which is the haunted chamber of the three portals. At a given signal they dash down the stairs each spook aiming to overtake the other. Having reached the subterranean passage, the recruits hold a stamping scrambling drill, which, to the poor unfortunates studying in the haunted chamber above, sounds like a stampede of wild elephants.

Following the grand stampede, a race to the foot of the stairs leading up, is indulged in. Upon reaching this objective, the mad throng takes the stairs by storm, and a process of falling up and down is practised. The top of the first flight of stairs, which is also the bottom of the second flight, is gained. A halt is called here, for a second or two, and several spooks practise whistling an out-of-date song, out of tune. The last lap, a flight of narrow, rickety stairs is taken on the jump. At the top the spooks reach their destination, upon entering the "Death Trap." But their training is not yet completed.

The finishing touch is added at twenty minutes after the hour, in the form of Chair Drill.

This drill consists of moving chairs forward, backward, and sideward; of picking them up and throwing them down; of scrambling them like eggs; and lastly, of spinning them like tops in a game of put-and-take. In five minutes this orderly drill is over. (For which certain unfortunates below are heartily thankful.) and then the whole program is gone through again, backwards. This brings the thoughtless spooks safely back into the main hall, where they enjoy a few minutes respite after their hard and strenuous drill.

One of the great advantages of this new course of drill is that there is no study connected with it, no tiresome fifty minute lectures; each spook has absolute freedom which he may use or abuse.

In passing we might add, that perhaps this drill has a special purpose in view. That purpose being the tearing down of the Arts Building. This will save much expense and worry when the time actually comes for the building to be pulled down; for which each hour of drill the spooks are knocking down tiny pieces of plaster, of walls, and ceiling; they are wearing out, and breaking up the chairs in "Chair Drill," they are scraping off the paint and wood from the floors and stairs.

But the Ides of March is coming down upon us, and April follows after with its reckoning. The thoughtless spooks will have to pay a double toll, for disturbing the unfortunates, and which is

GLEE CLUB TO GIVE MUSICALE

All Are Invited — Sunday Afternoon

The concert to be put on by the Glee Club on Sunday afternoon will come as a welcome treat to brain weary students, now that the stress of exams is over. McGill students have always been appreciative of the efforts of the college musical organizations and the Glee Club should have a sympathetic audience at their concert. The programme has been well arranged to afford variety and all the selections are in good taste. Mr. Harold E. Key, the director, deserves congratulation for his efforts to make the Glee Club a thing worth keeping in the college club. The concert will be held in the Lounge Room of the Union at 4 o'clock. A special invitation is extended to ladies.

R.V.C. DECIDES TO AID EUROPEAN STUDENTS

All the R. V. C. students who attended the meeting of the Undergraduate Society yesterday heard a very interesting and enlightening talk about the Student Relief Campaign. This was given by Mr. Robert Hall, one of the most prominent figures in McGill's part in the Campaign.

Mr. Hall first briefly described the appalling conditions now existing in Central Europe, and showed how badly help is needed there, especially among the Student Class.

He then mentioned certain objections which have been made to helping these students. For instance, people ask why they don't get out and work for themselves. The answer to this, of course, is that the majority of them are physically unfit, also that there are so many people without employment. Another objection raised, is that we are helping people who just a few years ago we were fighting. However, McGill is too big to think about that.

The handling of the Relief Campaign, Mr. Hall went on to say is done by the World Christian Student Federation. The students helped are those in the Senior Years, and the money is sent direct to Geneva.

At the conclusion of Mr. Hall's address, it was decided that R. V. C. should support the movement. Each class will look after its own subscriptions, and when the money is all in, it will be sent together, with the men's donation, to our fellow students overseas, who are so much less fortunate than ourselves.

MAKES SKI-JUMP OF 103 FEET

J. P. Carleton of Dartmouth recently made a ski-jump of 103 feet, at Bristol, N.H., setting a mark that the residents of the district may look forward to equalling in the distant future. The slide at Bristol is a new one, being recently completed. In addition to his straight jumping, Carleton made a somersault, which won the applause of the audience.

Society reporter writing for Student Life.—"Cooling refreshments were served and the young ladies showed skill in the way they filled up their programs.

I stepped on the street car so lightly A girl had stepped on just before Her skirts, they were short and real springy.

The story is now full of interest. So I'll tell you before it gets cold. This sweet little maiden so lovely. Was possibly six summers old.

"I hear that Mable nearly drowned the other day."

"Yes, the button came off her swimming suit and no one dared to save her."

"Let all the university students adopt a little more tolerance toward each other and toward us older folk even though we are not so well up on the classics."

"There are some colleges that turn out men more fitted to be chairmen of country club golf committees than anything else."

Dear Sweet Thing—"Oh! That's the first time I have ever been kissed by a man."

Young Hopeful—(surprisedly) "How do you class my room-mate. As an ape?"

"Sambo, Wha all is oy' pappy at?"

"Jest out feedin' de pigs an' yo' all can tell him by de red flannel shirt dat he am wearin'."

Stew—"What do you think of these short dresses on our fair co-eds?"

Dent—"Oh! I always look down on them."

Jimmie—"You say you've got the car tonight. Who shall we get?"

John—"Oh lets get Mable and Agnes, we haven't got much gas."

more to be point, for disturbing themselves. "O! what a fall was there, my countrymen."

(Many thanks to H.M. for suggestions.)

"Brushwood"

DENTS. WIN CLOSE HOCKEY FIXTURE

Dent '24 Defeat Science '25 By 2-1

Dentistry '24 defeated Science '25 by the score of 2-1 in a closely contested although rather ragged game in the class Hockey series—Dentistry, on the evening's play, deserved to win, as they had the better of the play for the major portion of the game and only the good work of Fairbanks in goal for Science '25 prevented the first half from being a runaway for the Dentists.

Play at the start was very ragged, either side looking dangerous for the first few minutes. Dent soon however got going and showed good combination, Mitchell and Richardson combining in a number of rushes, only to be foiled by Fairbanks. Dents seemed to tire under the fast pace, however, and after 15 minutes play, Burland poked the puck into their net from a mix-up in front of goal. Dents managed to even the score before the half time whistle blew, when the puck glanced off Fairbanks skate and trickled into the goal mouth.

In the second half, play was very even, both goalers being called on very frequently to save. The shooting and passing of both teams was very good, which accounts for the low score. Dents secured the only tally of the period when Mitchell put the rubber past Fairbanks, Richardson drawing Science defence to his side, and then passing to Mitchell. Science '25 tried desperately to score but their efforts were of no avail, and the game ended with the score 2-1 for Dentistry.

For Science Rae and Burland starred while Richardson worked hardest for dentistry.

The teams:—
Dentistry '24 Science '25.

Goal.	Fairbanks
Defence	
Kee	Mace
Rae	Kyle
Forwards.	
Mitchell	Burland
Legg	Crepeau
Richardson	Moore

UNIVERSITY SERVICE TO-MORROW MORNING

At the University Service to be held tomorrow morning at 11.00 A.M. in the lounge room of the Union, Canon Shattford, Rector of the church of St. James the Apostle, will speak on the subject: "Jesus and the Truth." Professor W. C. Graham will conduct the service, assisted by Sir Arthur Currie, while the Student Orchestra augmented by a student mix choir will provide the music. The service is open to all members of the University.

RHIME OF COLLEGE CRYME.

Sing a song of sixpence a note book full of junk.

Can't recall the doggone stuff—consequently flunk.

When the grades are totaled report looks awfully bad.

Now my major problem is explaining it to dad.

Dad is in the barnyard feeding sheep and swine.

Son is "up at College" just killing time. Mothers in the kitchen working all the day.

Think's her son's soon coming back to make things pay.

Son's found hopes have vanished, floated into air.

Finds he cannot make the grade, says he doesn't care.

Soon he'll be a working, feeding lazy kine.

That's a better method to occupy his time.

Mrs. A.—(teasingly) say, who is head of this house anyway?

Mr. A.—(firmly) I, and no other.

Mrs. A.—(triumphantly) Very well if you are the head you must figure that I am below you so I'll be the neck and from now on I'll turn you the direction I wish.

Poland—"Louise says her face is her fortune."

China—"She must have inherited a rouge factory."

It's called our Mother Tongue because father doesn't get much of a chance to use it.

STOLEN THUNDER.

"Mr. Interlocutor, can you tell me the difference between a bicycle and a cabbage?"

"No, Mr. Bones, I can't. Tell us, please, what is the difference between a bicycle and a cabbage?"

"If you don't know, you shore'd be a fine one to send after a cabbage."

The entire company will now execute. "A plumber can carry his tools but his pipe must always be lead."

Dean—So you admit the unfortunate lad was carried to the pump and there drenched with water. What part did you take in this disgraceful affair?

Stude—he left leg, Sir.

GOING THROUGH HE MOTIONS

Everybody knows of the one-horse town clerk who feverishly leans over his desk and plays tit-tat-toe as the boss puts his face through the office window.

Everybody knows or has probably experienced the case of the mechanic or ditcher or stitcher who lays down on the job and revels in his soldiering and sham attempts at keeping busy.

Everybody knows the puffed-up intellectual nonentities who put on all sorts of brazen "fronts" and think they are fooling their betters, who sooner or later learn to see through them.

Yes, the world sees through these people and coolly winks its eye at them, knowing full well their hollowness and knowing full well that their activity is simply superficial manoeuvrings, aimless actions carried on to deceive others. They are not real. They are just going through the motions!

"Going through the motions" is not a phenomenon that characterizes any particular walk of life. Its effect is felt everywhere in one form or another. But in the field of ideas, where the student is supposed to move and linger, the tendency to this mechanical bluffing is more prone to come to the fore. Here the product is so intangible.

In business, a man is judged by what he is worth in dollars and cents; in engineering, a man is judged by the durability and service of the structure he builds; in diplomacy, a man is judged by the actual good will he has created between nation and nation and with what wisdom he has brought about better national and international adjustments.

In other words, in the world of action a man is judged by his product. But in the world of books, it is far more difficult to judge by products, since often no perceptible product exists.

It needs no aid of a high-powered telescope to find in university circles this "going through the motions," tendency highly developed. People in a university have an extraordinary opportunity just to read mopeily, blankly, burying themselves in their books without knowing whether it is English or Sanscrit that they are reading—just words, words. Students can draw lines, write papers on all sorts of subjects, pass examinations, add, subtract, and multiply without understanding one iota of what they are doing. Students are a rare lot, but that is the truth, and there is no use hiding it. It is so easy to get by in a university just by going through the mechanical tricks of the game.

Professors try to cure the evil by an elaborate system of bugaboo examinations, but whether this adds a real incentive to the mastery of a subject is indeed very doubtful. Just what is needed is no bugaboos, but a sincere, frank desire to do way with so much sham in our intellectual life at the university.

Too much need not be said on this score. It is always a problem with every worth while man or woman. It is a question of doing some constructive definite thinking or just going through its exterior motions. Which it shall be lies with the individual himself.

A PROHIBITION DITTY

(Written after a Lecture in Chemistry.)
Now Fe. runs a motor boat
For C2 H6 O.

Said she to me, "Now Ba. sport,
And U. and I. will go.
Just out to Ca. league or two
For bottled Ti. think,
Pt. and Se. both will come
For Ne. kind of drink.

Said I, "O. that will B. O. K.,
'Ni. will Cu. through,
Who interferes will Cl. sure,
B. many they or few."
Said Fe., "Sure U. Ra. man,
Now Ru. ready dear?
If Ne. one is still afraid,
Ge. can stay right 'ere."

The C2 H6 O. we got,
Just three miles out from land,
Pt. and Se. said 'twas fine,
'Ni. thought it was grand.
Th' affinity we had for it.
Created an uproar
Like adding drops of H2 O.
To H2 SO4.

FAMOUS CLOSING LINES.

"A hot sketch," said the painter as his canvas went up in flames.

Sound travels at the rate of 400 yds. per second, but thru very accurate experiments it has been discovered that there are several exceptions to this rule: Scandal—1000 yds. per second. Flattery—500 yds. per second. Truth—2.5 yds. per second. An Alarm Clock—1 foot per second.

THE INGENUE SPEAKS.

I never had a party
That was even halfway wild.
I'm as simple and as guileless
As a blushing little child.

And as a child I wear my skirts
Just barely to my knee;
But I never roll my stockings
As it isn't hard to see.

I never go dancing
Without a watchful chaperone,
And I never go out riding
In any car except my own.

My language never is profane;
I scorn the cigarette.
I don't read Snappy Stories
Or the pink Police Gazette.

Do you believe these things are true,
This inane tommyrot?
Don't take my word for everything—
They're not.
